

Work Health and Safety Policy

- Establish procedures to comprehend and update the legal requirements applicable to our business activity and other commitments undertaken, as well as its compliance.
- Raise staff awareness through information, training and sensitivity on the importance of a correct execution of their activities, encouraging their participation in the fulfillment of objectives.
- Operate with transparency with administrations, institutions and communities involved in FTESA's business environment and cooperate closely with them in the prevention of potential hazards that may affect work conditions.
- Identify threats, assess and control significant HSE risks.
- Protecting workers' health and the prevention of harm to employee health is one of FTESA's commitments, as well as a continuous improvement in the administration and the safety performance at work. The Management is responsible for achieving a safe and healthy working environment.
